

# BGAN terminals

## A quick reference guide

Inmarsat's Broadband Global Area Network service – BGAN – is accessible via a small, lightweight, satellite terminal, which is easy to carry, quick to set up and simple to use. And you can use the same device worldwide.

A range of terminals is available, providing performance options to suit different operational needs. The service is accessed via BGAN LaunchPad, a software interface, which is standard across all terminals.

					
	Wideye™ Sabre™ I Voice and data, entry-level device	Nera WorldPro 1000 Smallest, lightest device in the range	Explorer™ 500 High bandwidth, highly portable device	HNS 9201 High performance, multi-user device
